Just for a Princess

BY DVIRA OVADIA OF DVIRA INTERIORS WWW.DVIRA.COM
PHOTOGRAPHY BY STEPHANIE BUCHMAN

Designer Dvira Ovadia recently completed a serene nursery and baby room that is fit for a princess that can grow with her room. Plenty of girly touches adorn this room, yet the pretty pieces are versatile and can work for baby, toddler and even a young girl.

While incorporating a lot of classic pieces, like the mirrored dresser, chandelier and silhouette prints, we used the adorning pieces in a contemporary fashion. Keeping the look very clean and contemporary with the warmth of timeless pieces.

This girl's room incorporates all the functions of a child's room: A sleeping area, a book nook, storage for clothing, shelves for toys and books, and a warm carpet where the child can sit and play.
